

Whole Home Protection

Next-Level Whole Home Surge Protection Is Here.

Designed for Multiple Brands of Electrical Panels

The DTK-120/240BK1 is DITEK's latest innovation to meet the needs of electricians and consumers who increasingly depend on surge protection to protect electronics and appliances from daily power surges. This circuit breaker-style surge protective device (SPD) sets a new standard for flexibility and affordability, with electricians only needing to inventory one surge protector model that fits multiple load centers with 1" breaker spacing.

Additional features include an audible alarm with a silence switch, as well as an LED that provides visual indication of SPD function.

Stay up-to-date with the 2020 and 2023 NEC requirements and upgrade to next-level residential surge protection with the DTK-120/240BK1.

As part of DITEK's Whole House Series, the DTK-120/240BK1 helps protect homes from damaging power surges that can affect expensive electronics, household appliances, HVAC systems, and pool pumps.

Type 2 SPD | 20kA In | UL1449

- 50kA surge current rating
- Audible alarm with silence feature
- Plug-on circuit breaker installation
- UL Classified for specific load centers
- 5 Year $25,000 residential connected equipment warranty

Load Center Compatibility

- Square D Homeline Series
  Circuit Breaker Type "HOM"
- Eaton BR Series
  Circuit Breaker Type "BR"
- Siemens EQ, PL, ES, PN, SN Series
  Circuit Breaker Type "Q" or "QP"
- GE PowerMark Gold Series
  Circuit Breaker Type "THQL"
