

Data Center Protection

Critical Surge Protection to Support Data Center Infrastructure

For over 30 years, commercial and industrial property owners have trusted DITEK to preserve their facilities, electronics, and data from the negative impacts of power surges.

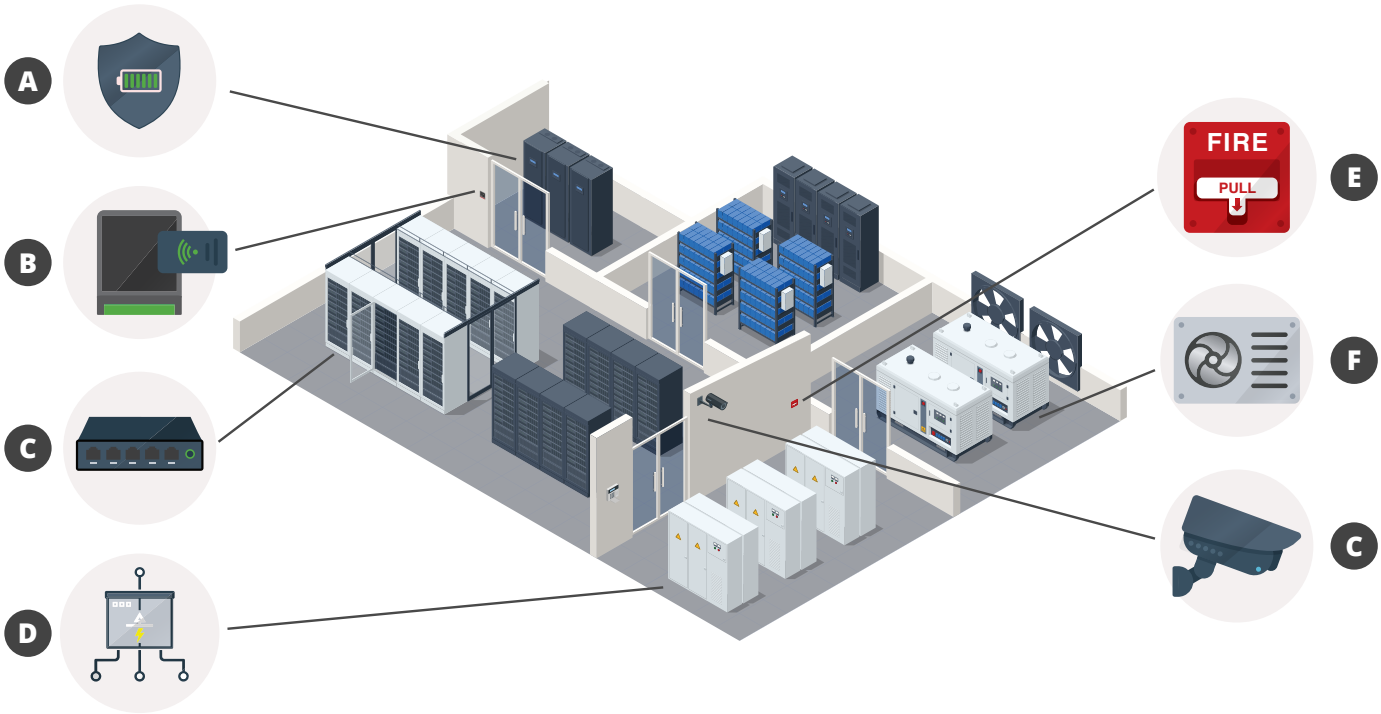

Layered surge protection supports data centers with uptime and reliability.

Data centers rely on complex electrical infrastructure, including HVAC, fire safety, security, and networking systems to maintain reliable, redundant, and secure operations. Layered surge protection safeguards these critical systems from damaging power surges and spikes that can cause equipment failure, data loss, downtime, and costly repairs. As data centers expand and electrical demands increase, incorporating a comprehensive surge protection plan for equipment is essential for maintaining uptime, performance, and long-term reliability.

REDUCE DOWNTIME

EXTEND EQUIPMENT LIFE

MITIGATE RISK

A UPS TECHNOLOGY

FEATURED PRODUCT:
UPS+ SERIES

From surges and spikes to brownouts and complete power loss, keep your equipment up and running when it matters most.

D ELECTRICAL DISTRIBUTION SYSTEM

FEATURED PRODUCT:
D300M SERIES

Protect your entire electrical system from damaging power surges with built-in safety features to support reliable, ongoing operation.

B ACCESS CONTROL

FEATURED PRODUCT:
DTK-LVLP SERIES

Maintain secure access to buildings and restricted areas by guarding access control systems against damaging power events.

E FIRE SAFETY

FEATURED PRODUCT:
DEFLECTOR SERIES

Shield fire safety systems from damaging power surges and alert staff immediately if protection is compromised.

C NETWORK & VIDEO SURVEILLANCE

FEATURED PRODUCT:
NETS SERIES

Designed for high-speed networked equipment to help keep security and connectivity in place and protect essential devices.

F HVAC

FEATURED PRODUCT:
D50 SERIES

Safeguard HVAC systems against damaging transient surges and spikes that can disrupt performance and shorten equipment life.
